Subject: FW: Draft ARSG Timeline

Steve – I know you are busy in the field somewhere – Silverton??

Anyway, can you take a look at the ARSG timeline that Peter Butler sent out on Sunday and let me know if you have any thoughts to add. Steve Wharton wants the team to develop some concise talking points on the ARSG time line topics that will provide the agencies' goals.

Also, I sent you a copy of the draft Q/A for the comm strat for both the open house and the LP BOCC meeting. Can you take a quick look at it and add any comments, edits, new Qs, etc. I'm trying to manage all of this while Cynthia is gone.

Anything you can send me soon will be much appreciated. Thanks.

Thanks Dan. After reading through the ARSG Timeline, I'm recommending that the team develop some concise talking points regarding each of the major topics mentioned in the document including the risk assessment. The point of this exercise is not to refute any particular statement in the Timeline, but rather to clarify the agencies' intentions and goals with respect to our actions or proposed actions. We already have much of this information in the draft communication strategy for the open house, but it would be advisable to have a ready list of responses that aligns with the 12 or so distinct points contained in the Timeline.

Since Cynthia is out until next Monday, please include Libby in the development process.

Thanks,

Steve

I have some comments on his characterization of the aquatic ecological risk assessment that I believe need to be incorporated.

Thought you all might like to see this in advance of our meetings in Silverton in a couple of weeks.

Hi Folks – Here is the latest attempt at a timeline for events to address metal loading in the Animas. If you've got any comments, please let me know by Monday the 15th. Then I'd like to send this out to the larger group. Thanks.
